

Cisco Aironet 3500 Series Access Point

Indoor Access Points

Cisco Aironet® 3500i Model

- Sleek design with internal antennas
- Ideal for carpeted offices

Cisco Aironet 3500e Model

- Rugged metal housing and extended operating temperature
- Ideal for factories, warehouses, and other indoor industrial environments
- Versatile RF coverage with external antennas
- UL 2043 plenum-rated for above-ceiling installation options or suspended from drop ceilings

Self-Healing and Self-Optimizing Wireless

- Classify over 20 different types of interference, including non-Wi-Fi interference within 5 to 30 seconds
- Automatic remedial action and less manual intervention

Secure Interoperability

- Controller-based Deployment Only

Troubleshooting Forensics for Faster Interference Resolution and Proactive Action

- Spectrum Expert Connect provides real-time, raw spectrum data to help with difficult-to-diagnose interference problems
- Air Quality Index provides a snapshot of network performance and the impact of interference
- Historic interference information for back-in-time analysis and faster problem solving
- 24 x 7 monitoring with remote access reduces travel and speeds resolution

Robust Security and Policy Enforcement

- Industry's first access point with non-Wi-Fi detection for off-channel rogues
- Supports rogue access point detection and detection of denial-of-service attacks
- Management frame protection detects malicious users and alerts network administrators
- Set policies to prohibit devices that interfere with the Wi-Fi network or jeopardize network security

Cisco® Aironet® 3500 Series Access Points with Cisco CleanAir technology are the industry's first [802.11n access points](#) to create a self-healing, self-optimizing wireless network. CleanAir technology is a systemwide feature of the Cisco Unified Wireless Network that improves air quality by detecting RF interference that other systems can't recognize, identifying the source, locating it on a map, and then making automatic adjustments to optimize wireless coverage. These innovative access points provide the highest-performance 802.11n connectivity for mission-critical [mobility](#). By intelligently avoiding interference, the 3500 Series offers performance protection for 802.11n networks to help ensure reliable application delivery.

RF Excellence

Building on the Cisco Aironet heritage of RF excellence, the 3500 Series delivers industry-leading performance for secure and reliable [wireless](#) connections. Enterprise-class silicon and optimized radios deliver a robust mobility experience using Cisco M-Drive technology, which includes:

- [ClientLink](#) improves reliability and coverage for legacy clients
- [BandSelect](#) improves 5-GHz client connections in mixed client environments
- [VideoStream](#) uses multicast to improve rich-media applications

All of these features help ensure the best possible end-user experience on the wireless network

Cisco also offers the industry's broadest selection of [802.11n antennas](#) delivering optimal coverage for a variety of deployment scenarios

Scalability

The Cisco Aironet 3500 Series is a component of the Cisco Unified Wireless Network, which can scale up to 18,000 access points with full Layer 3 mobility across central or remote locations on the enterprise campus, in branch offices, and at remote sites. The Cisco Unified Wireless Network is the industry's most flexible, resilient, and scalable architecture, delivering secure access to mobility services and applications and offering the lowest total cost of ownership and investment protection by integrating seamlessly with the existing wired network.

Product Specifications

Table 1 lists the product specifications for Cisco Aironet 3500 Series Access Points.

Table 1. Product Specifications for Cisco Aironet 3500 Series Access Points

Limited Lifetime Hardware Warranty

This Cisco Aironet 3500 Series Access Point comes with a Limited Lifetime Warranty that provides full warranty coverage of the hardware for as long as the original end user continues to own or use the product. The warranty includes 10-day advance hardware replacement and ensures that software media is defect-free for 90 days. For more details, visit <http://www.cisco.com/go/warranty>.

Cisco Wireless LAN Services

Seamlessly integrate mobile services and take full advantage of the systemwide capabilities of the Cisco Unified Wireless Network with services from Cisco and our partners. Better utilize the self-healing, self-optimizing features built into the silicon-level intelligence of CleanAir technology and the increased performance of the 802.11n standard while simplifying the transition to these new technologies. For more details, visit <http://www.cisco.com/go/wirelesslanservices>.
